

SERVICES PROVIDED BY GCI

- Owner's Authorized Representative (OAR)
- Project Management (PM)

MAIN PROJECT ELEMENTS

- Subgrade and Ponds Earthwork
- Concrete Pavement and Foundations Work
- Subsurface Storm Drainage and Pond Liner Installation
- Water Main and Electrical Communication Duct Installation
- Pre-Engineered and Metal Frame Structures

ORLANDO INTERNATIONAL AIRPORT BP-310, Operations Fire Training Facility

This project provided fire, crash and rescue training facilities for the Orlando International Airport. Included in the project was the construction of 96,000 square feet of 8-inch thick concrete pavement; installation of a prefabricated, four-story fire training building; mounting of a Boeing 737 aircraft fuselage; installation of a 5-wide, modular classroom facility; construction of a reinforced concrete pipe storm drainage system, a retention pond for chemical run-off, a stormwater retention pond and a ductile iron pipe water main system with fire hydrants.

The project also included installation of security fencing, 50-pair copper telephone and 12-strand fiber optic communication cables, as well as the installation of exterior area lighting.

CONSTRUCTION COST: \$945,000
COMPLETION DATE: JUNE 2001
