## ORLANDO INTERNATIONAL AIRPORT BP-S001, South Terminal Complex Infrastructure

The project included final clearing, grubbing and de-watering of a fill site for the new South Terminal Complex. The project also included preparation of the borrow site; hauling and placement of 3.2 million cubic yards of embankment-in-place; a new haul road bridge over a bypass canal; relocation of the Airfield Operations Area (AOA) security road and fence.

The work performed also included installation of a communications ductbank; relocation of FAA data cables; construction of a new water control structure; construction of an owner's office complex and the paving of haul and site access roads.

**CONSTRUCTION COST: \$23,600,000**  
**COMPLETION DATE: JANUARY 2001**
