- Taxiway and Shoulder Paving
- Embankment

## ORLANDO INTERNATIONAL AIRPORT BP-358, Extension Of Airside 2 Taxiway Connectors

This project consisted of the phased construction of two new taxiway connectors H2 and G1, between the Airside 2 Ramp and Taxiway H at the Orlando International Airport.

This work included maintenance of the Airfield Operations Area (AOA) traffic, demolitions, excavations, embankments and installation of new drainage structures, econcrete placement, Portland Cement concrete pavement, asphalt shoulders, in-pavement and elevated lighting, pavement markings, fiberform and sod placement.

**CONSTRUCTION COST: \$3,900,000**  
**COMPLETION DATE: FEBRUARY 2006**
