- Monitor Wall
- Self-assisted check-in facilities

ORLANDO INTERNATIONAL AIRPORT BP-447, Main Ticket Lobby Project Ticket Lobby Modification Program

This Main Ticket Lobby Project improved the Orlando Airport Experience[®] by increasing capacity and appeal of the existing ticket lobby areas. Approximately 1,250 LF of exterior walls were relocated towards the enplane curbs adding 35,185 SF to the Main Ticket Lobby. The finishes in the new and old space were upgraded and the added area allowed the installation of new self-assisted check-in facilities. A new monitor wall was installed behind customer service desks and existing systems and infrastructure within the lobby was upgraded.

CONSTRUCTION COST: \$79,800,000
COMPLETION DATE: April 2019
