- Project Management (PM)
- Construction Inspection

MAIN PROJECT ELEMENTS

- Customer Service Initiative project
- Additional seating for Main Terminal
- Floor finishes
- Power and data outlets to support both new seating and mobile retail units

ORLANDO INTERNATIONAL AIRPORT V-777, North Terminal Moving Sidewalk Removal

All moving sidewalks on Level 3 of the North Terminal at Orlando International Airport were removed to improve access between the retail shops and the food court. Additionally, the Customer Service Initiative identified the need for increased seating near the tenant retail shops located in this area, as well as in the center of Landside area adjacent to the food court.

The North Terminal Moving Sidewalk Removal project removed four (4) sets of moving sidewalks, infilled the removed slab with tile or terrazzo to match existing floor finishes, and incorporated power and data to support mobile retail units and new GOAA supplied seating.

CONSTRUCTION COST: \$903,000
COMPLETION DATE: May 2016
